

CA 2E Advanced Training

CM First's CA 2E Advanced course takes students through a full software lifecycle scenario design and implementation of an application involving database files, numerous access paths, and most importantly 25+ functions. Review of all the CA 2E concepts is included, with advanced exercises designed to evaluate and reinforce CA 2E knowledge required for real-world CA 2E projects.

CA 2E ADVANCED TRAINING COURSE OUTLINE

Data Modeling

Review design concepts with in-depth information on understanding the role of the DBA and cover the following advanced topics:

- + Involution
- + Sharing
- + Redirection
- + Assimilation

Model Management

Review of CA 2E concepts with advanced information regarding topics including:

- + Model Values
- + Modification of *Shipped Files
- + Model Profile
- + Model Object List Processing
- + Impact Analysis

Access Paths

Review of Access Path basics. Additional information on advanced topics and access path types, including:

- + Implementation Options
- + Use of Access Path Relations
- + Performance Considerations

// We provide on-site, classroom, web-based, or blended training for our various products and services.
For more information, contact CM First.

Functions

Complete review of function design and construction in 'real world' application structure.

The following topics are covered in depth at an advanced level:

- + Device Designs
- + Action Diagram User Points
- + Parameters
- + Function Fields
- + Built-in Functions
- + Messages
- + Function Options
- + Retrieve Objects
- + Advanced Functions
- + Arrays
- + Print Objects function type
- + User Programs
- + User Source
- + Additional topics depending on customer environment
 - Commit Control
 - Duplicate Parameter definition
 - DataBase Trigger Functions
 - RPG / COBOL ILE
 - Using SQL
 - Synon/1 Utilities
 - Advanced tips and techniques
